

## Fire Suppression Options

**Direct Release Fire Protection System** utilizes the tube as both the "Detection Device" and "Suppressant Delivery System". As the fire begins, the portion of the tube nearest the point where the most heat is detected ruptures, forming an effective spray nozzle. The pressure will then drop as the tube releases the entire contents of the cylinder through the distribution nozzle to effectively suppress the fire.

**Indirect Fire Protection System** uses the tubing as a Fire Detection and System Activation. Once the tubing senses the fire, it then ruptures and the resulting drop in pressure causes the Indirect Valve to activate. CO2 is then discharged from the cylinder through a fixed piping network and out of the diffuser nozzles, flooding the area in extinguishant and suppressing the fire quickly and thoroughly.

Direct

## The New Way To Do Medical Right!

## ProGrow Medi-Box

Available At:  
**Advanced Pro Grow Hydro**  
 #406 - 1952 Kingsway Avenue,  
 Port Coquitlam, BC V3E 1P2  
 1-604-945-9532

## ProGrow Medi-Box

**Mold / Mildew Resistant**  
**Insulated**  
**Fire Rated**  
**Water Tight**

## The New Way To Do Medical Right!

**Tel: 604-945-0174**

## Completely Customizable

- 8' x 8' to warehouse dimensions.
- 12 ft. roof span without support.
- Assembly/disassembly in hours.
- Municipality Accepted.
- Indoor/ Outdoor Units
- Urethane coated panels.
- Variety of colors available.
- CSA approved ballast enclosures.
- Electrical setup designs available.
- "Plug and play" options.

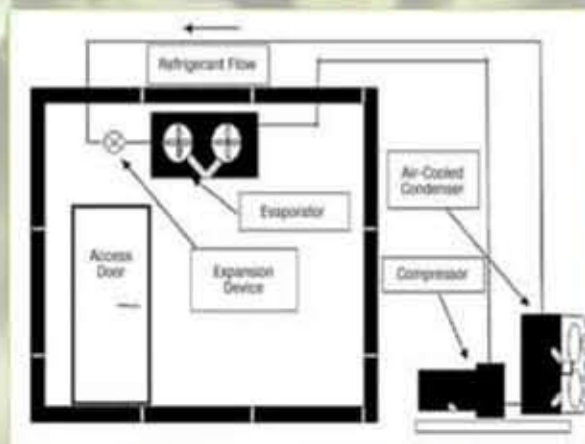

## Security

- Reinforced fire rated metal door.
- Completely Metal Clad exterior.
- Can be a sealed environment.
- Odor in and pests out!
- Optional fire suppression systems.

## Benefits

- Offers protection against theft.
- Mildew and Mold resistant.
- Sterile environment.
